

NEW MODEL: LIGHT!

VACUCOBRA CONSTRUCTION

**EASY-TO-USE
OPERATING CONTROLS**

ERGONOMIC DESIGN

**LIGHT ATTACHMENT, THIS IS
WHERE THE FUN BEGINS!**

A combination of VacuCobra design and VacuEasylift know-how

The VacuCobra VC100 Light is a "stripped" version of the basic VacuCobra with endless possibilities:

Combine the ergonomic design and clever construction with the wide range of applications available for the VacuEasylift. All suction feet and accessories for the VM100/120/140 models can be attached. The VacuCobra Light can be used with and without quick coupling. Custom made suction feet are also a possibility.

With VacuCobra Light you can approach your client with a competitive basic offer, adding the features suitable in each case. The standard model VC100 is of course still available, with standard suction cup and swivelling/side lifting functions.

Always the best choice for high frequency box lifting!
